1. Pressed and hold the knob for 3 - 5 seconds before turning it.

2. After flame ignites, keep pressing the knob for 5 more seconds before releasing it to prevent the flame from going out.

When either of the knobs is pressed, both ignition pins will light up, indicating that the gas is ready to ignite. However, the gas supply for each burner is separate, so only the burner that has been turned on will ignite and produce a flame.
