

# Equalow

Perfecting the Art of Low-flame Cooking

## 4 Fire Modes:

Low, centralised heat

Medium heat

High heat

Low, evenly distributed heat (Equalow)

SENZ Tri-Ringz Gas Hob

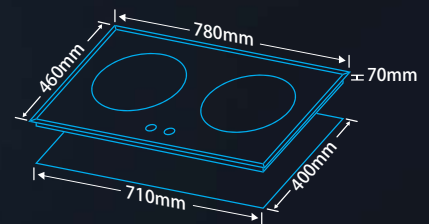

VS

Normal Gas Hob

- When on Equalow mode, all three burner rings are ignited
- Equal heat is distributed throughout the pan
- Even cooking for excellent results
- Has 6.4kW heat intensity

- When on low flame, only inner ring is ignited
- Middle part of the pan is heated but its surrounding surface is poorly heated
- Uneven cooking, unsatisfactory results
- Normally has 4.5kW - 5.5kW heat intensity

## Other Highlights

- Triple rings for 4 times the control
- Top-notch brass burner
- Fast ignition technology
- Built-in Flame Failure Device (Auto gas cut-off within 15 seconds)
- 8mm-thick premium tempered glass
- Battery operated auto-ignition
- Removable burner cap
- Easy to clean
- Safety valve
- Gas type: LPG

Triple Ring Burners

Triple Rings For Three Times The Control

The SENZ Tri-Ringz Gas Hob features triple ring burners where each ring's flame is adjustable and controllable on its own. You can decide the heat intensity and amount of rings needed based on your chosen cookware, cooking method & what you're cooking. Truly elevating your cooking experience!
